## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 13 May 2005.
- 2a) ☐ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

1. The Amendment filed by Applicant on 05/13/05 and Terminal Disclaimer filed by Applicant on 03/01/05 have been entered.

***Response to Amendment/Arguments***

2. Applicant's Terminal Disclaimer filed on 03/01/05 has been fully considered and found persuasive.

3. The previous double patenting rejection is withdrawn.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for

establishing a background for determining obviousness under 35

U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1-4, 6-19 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wenzel, U.S. Patent No. 6,180,735.

The present invention claims the following open-ended steps:

forming a supported activator wherein the supported activator is in mineral oil and contacting the supported activator with a combination consisting essentially of a ligand and a metal compound. Wenzel teaches the mixing of a supported activator and with a transition metal compound formed from a ligand and metal compound. See col. 21, lines 20-32. Wenzel further asserts that any order of mixing will suffice. See *id.* Wenzel further asserts the use of mineral oil to mix the catalyst followed by polymerization. See col. 21, lines 32-37. The Examiner contends that the addition of carbonyl is immaterial because the claim uses the transitional phrase "comprising." Furthermore taken these embodiments together one of ordinary skill would be motivated to combine supported co-

catalyst/mineral oil with the transition metal compound to form a catalyst ready for polymerization because Wenzel has provided the ingredients and orders of mixing that would suffice leading one of ordinary skill to merely optimize the catalyst preparation and polymerization.
